EDUCATION

SVKM's Dwarkadas J. Sanghvi College of Engineering

B.Tech, Computer Science & Engineering (Data Science) | CGPA: 8.77 / 10.00

Mumbai, India

Aug 2023 – Aug 2027

TECHNICAL SKILLS

Problem Structuring & Analytics: Business Problem Decomposition, Root Cause Analysis, Statistical Analysis, Composite Scoring Models, K-Means Clustering, Python (Pandas, NumPy, Scikit-learn), SQL, SQLite

Quantitative Modelling: Risk Scoring & Classification, LTV:CAC Analysis, Performance Segmentation, Concentration Risk Analysis, Data-Driven Strategy Development

Communication & Reporting: Insight Synthesis, Executive Memo Writing, Power BI (DAX, Star Schema), Excel (Advanced) – automated dashboards, metrics design

AI & Automation: Agentic Workflow Design, LLM Prompt Engineering, Automated Report Generation, Groq API, Git

PROJECTS

Pharma Procurement Risk Intelligence System

May 2026

- Structured a multi-dimensional procurement risk framework across price volatility, delivery, and quality for 400+ purchase orders across 15 suppliers; identified 4 Critical suppliers representing Rs. 4.9 Cr in intervention risk and presented findings as a boardroom-ready CFO memo with prioritised reallocation recommendations.
- Designed a 4-step agentic pipeline to autonomously classify supplier risk and generate executive decision memos via LLM, reducing quarterly reporting from days to on-demand and enabling faster client-side intervention.
- Analysed that 64% of procurement spend sits in Medium-risk suppliers with no Critical flags; applied molecule-level concentration analysis to surface hidden strategic dependency risk and recommended diversification strategy.

Beauty & Personal Care E-commerce Analytics

May 2026

- Diagnosed revenue stagnation despite 18% user growth by reframing the business question from demand to discount strategy; structured the root cause analysis to isolate the true driver before recommending channel reallocation.
- Designed an LTV:CAC framework across acquisition channels over 18 months; communicated to stakeholders that 55% of customers were acquired at a net loss, with a $5.5\times$ return rate gap between discount tiers driving the recommendation.
- Quantified Rs. 1.32 Cr in revenue leakage and Rs. 29.6 L in refund risk; synthesised findings into an automated Power BI dashboard projecting 40–50% CAC reduction, enabling data-driven budget reallocation decisions.

Pharma Field Force Analytics

April 2026

- Structured the analytical problem from a client brief: zero return on a 20% headcount increase; designed a framework to isolate underperformance drivers across 200 MRs, 500 doctors, and 6 zones using PostgreSQL star-schema modelling.
- Applied K-Means clustering to classify field representatives into 4 performance personas, each mapped to a distinct root cause; translated segmentation output into targeted intervention recommendations for zone-level leadership.
- Uncovered an $8\times$ conversion gap and synthesised a Rs. 45 L revenue opportunity within existing capacity; communicated findings to demonstrate how rigorous analysis drives decisions without incremental spend.

CERTIFICATIONS

Data Visualisation: Empowering Business with Effective Insights – Tata iQ | Forage

May 2026

Data Analytics Virtual Job Simulation – Deloitte Australia | Forage

June 2025

LEADERSHIP EXPERIENCE

Vice Chairperson – DJS NSS

June 2025 – present

SVKM's DJSCE

Mumbai, India

- Coordinated a year-round blood donation programme across hospital administrators, doctors, and college authorities; organised 3 drives collecting 1,000+ units and 70+ volunteers per event, managing competing priorities and live crises with no established playbook.
- Directed a 7-day rural development camp at Dahanu; structured parallel workstreams across 50+ volunteers (surveys, medical camps, solar installation) and delivered committed outcomes under ambiguity with no central oversight.
